Which boat will float?

Scientists: Olivia and Evelyn

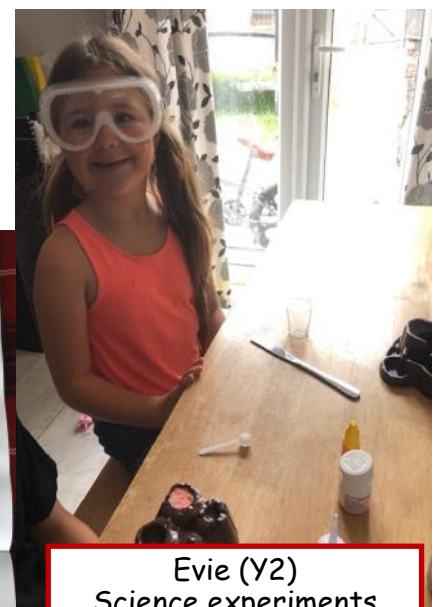

Ask a Question	Which boat will float for the longest out of paper or card?
Make a Prediction	We both predicted that the card board boat would float for the longest.
Materials I will use are...	<ul style="list-style-type: none"> Paper Card The bath Water
Observe	
Record your results	<p>We found that the...</p> <p>The paper boat floated for 5 minutes and</p> <p>The cardboard boat floated for 6 minutes.</p>
Conclusion	Evelyn and I found out that the cardboard boat floated for the longest and was the better material to use.

Next Steps Our next experiment will be to collect objects and place them on to the boats to see if they float or sink.
